

Priya Mehta

Data Scientist / ML Engineer

priya.mehta@outlook.com · +91-87654-32109 · LinkedIn: /in/priyamehta · Kaggle: kaggle.com/priyamehta · Pune, India

SUMMARY

Passionate Data Scientist with 1 year of industry experience and a strong academic background in statistics and machine learning. Skilled in Python-based ML pipelines, model deployment, and data visualisation. Kaggle Competition Expert with 2 silver medals. Eager to apply deep learning and NLP expertise to solve real-world problems.

EXPERIENCE

Junior Data Scientist

Analytix360 · Pune · Aug 2023 – Present

- Built a churn prediction model (XGBoost + SHAP) with 89% recall, saving the client ~₹1.2Cr annually in retention spend.
- Automated ETL pipeline using Apache Airflow + pandas, reducing data preparation time from 6 hours to 20 minutes.
- Developed an NLP sentiment classifier (BERT fine-tuned on HuggingFace) for customer review analysis across 5 languages.
- Created interactive Tableau dashboards consumed by C-level stakeholders for weekly business reviews.

Data Science Intern

InsightHub Analytics · Remote · Jan 2023 – Jul 2023

- Performed EDA on 2M+ rows of e-commerce data using Pandas and Seaborn, uncovering key seasonality patterns.
- Trained and evaluated regression models (Ridge, Lasso, Random Forest) for demand forecasting; achieved RMSE of 4.3%.

EDUCATION

M.Sc – Data Science & AI

Symbiosis Institute of Technology · Pune · 2021 – 2023

- CGPA: 9.1 / 10 · Thesis: 'Federated Learning for Medical Image Segmentation'

B.Sc – Statistics (Honours)

Fergusson College · Pune · 2018 – 2021

- First Class with Distinction · Minor: Computer Applications

SKILLS

Languages	Python, R, SQL
ML / DL	scikit-learn, XGBoost, PyTorch, TensorFlow, HuggingFace Transformers
Data	Pandas, NumPy, Spark (basics), Airflow, dbt (basics)
Visualisation	Matplotlib, Seaborn, Tableau, Power BI
Cloud	AWS SageMaker, Google Colab Pro, MLflow
Concepts	Statistics & Probability, Feature Engineering, Model Evaluation, NLP, Computer Vision

NOTABLE PROJECTS

Medical Image Segmentation (M.Sc Thesis)

· · 2023

- Implemented U-Net architecture in PyTorch for lung tumour segmentation on CT scans; achieved Dice score of 0.91.
- Applied Federated Learning (PySyft) to train across 3 hospital datasets without sharing raw patient data.

ACHIEVEMENTS

- Kaggle Competition Expert – 2 Silver Medals (Tabular Playground, NLP competitions)
- Google Data Analytics Professional Certificate (Coursera, 2022)
- Published paper: 'Attention Mechanisms in Medical Imaging' – ICML Workshop 2023
